
Date of Delivery: 03/26/2019	Ship To: 3R Techno ogy	Pickup: [REDACTED]
Order Number: O-12477	Gen Ga dos	[REDACTED]
Invoice Number:	5511 1st Ave S	[REDACTED]
BOL Number: BOL-000012477	Seatt e, WA 98108	[REDACTED]
PO Number:	USA	[REDACTED]
Contract #:	P: 206-582-7100	USA

Certificate of Destruction

This document certifies that the materials received by 3R Technology were handled in conformance with the requirements of the R2 (Responsible Recycling) Standard, relating to environmental, health, safety, and security aspects of electronics recycling.

R2 requires e-recyclers to assure that toxic material streams are managed safely and responsibly by downstream vendors all the way to final disposition. It also prohibits e-recyclers and their downstream vendors from exporting these toxic materials to countries that have enacted laws making their import illegal.

3R Technology is also compliant with the Washington Department of Ecology's Dangerous Waste Regulations, Chapter 173-303 WAC.

Methods used by 3R Technology and its downstream recyclers to recover component materials assure that all equipment, devices, or products contained in this load(s) were destroyed, separated by component/ material and recycled in an environmentally safe manner conforming to the R2:2013 standard.

Data on computer hard drives were destroyed through a NAID-AAA Certified physical shredding process.
